How We Approach Formation

Tengri Global Group coordinates company-formation and market-entry requirements by first understanding the commercial objective, owners, intended activity, target market, banking/payment needs, staffing or visa requirements where relevant, and the timeline.

Important distinction

Company incorporation is only one part of entering a market. Licensing, tax, banking, immigration, professional regulation and local-office requirements vary by country and activity and may require separate authorised providers.

Core Markets

United Kingdom

Private-company incorporation coordination, registered-business planning and connection to practical digital launch requirements.

Dubai / UAE

Mainland or free-zone setup coordination based on activity, ownership, office and visa requirements, using appropriate licensed local providers where required.

Türkiye

Company and market-entry coordination supported by appropriate local accountants, lawyers, notaries or other professionals where needed.

Georgia

Company-formation coordination and practical market-entry support based on the client's activity and structure.

Other markets

Requirements-led coordination may be available where suitable local specialists and partners can support the requested jurisdiction and activity.

Typical Client Journey

1. Discovery and jurisdiction shortlist. 2. Activity and shareholder review. 3. Cost/document checklist from the relevant provider. 4. Incorporation and statutory steps. 5. Banking/payment and operational support where available. 6. Website, CRM, software and marketing launch. 7. Ongoing growth or market-entry support.

What Is Not Guaranteed

Government approval, bank-account opening, visas, tax outcomes, licences, residency or immigration results cannot be guaranteed. Final eligibility, fees, timelines and compliance requirements are determined by the relevant authorities and regulated providers.
